

ENVIRONMENTAL POLICY

NITRIFLEX, solidified as one of the largest suppliers of nitrile rubbers and special polymers in Brazil and abroad, aims to make its activities and products compatible with the environment, aiming at meeting the needs of the present without compromising those of future generations. For this, NITRIFLEX is committed to environmental protection in its decision-making processes and integrated into its Quality Policy.

Our fixed environmental principles are:

- 1. Meet the legislation and environmental regulations, as well as other requirements which NITRIFLEX supports;**
- 2. Promote, across all business hierarchy levels, the sense of individual responsibility in relation to the environment;**
- 3. Evaluate, control, and prevent the environmental effects of NITRIFLEX's processes.**
- 4. Foster continuous improvement in environmental performance by reducing waste and optimizing the use of natural resources and inputs, establishing environmental objectives and targets, which are available to any interested party in the Environment area.**
